

HEAT EXCHANGER

REINVENTED BY LUNOS

70 % less energy consumption in production,
50 % weight saving (compared to a ceramic element) &
100 % recyclable. With the new heat exchanger, our fans
are lighter & more sustainable than ever before.

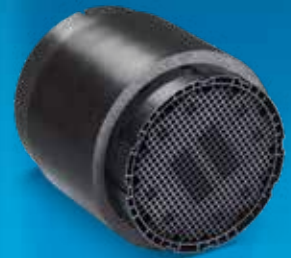

e⁹⁰-series with 3 models

With the new heat exchanger the e⁹⁰60 belongs to the class of two-channel devices not only one of the smallest, but also one of the lightest & most sustainable fans with heat recovery in home ventilation.

e²-series with wireless screen

With the new heat exchanger the fans in the e² series belong in the class of single-channel devices not only one of the smallest, but also one of the lightest & most sustainable fans with heat recovery in home ventilation.

LUNOS – THE ULTIMATE WAY TO VENTILATE
