

SMALL DEVICE BIG IMPACT

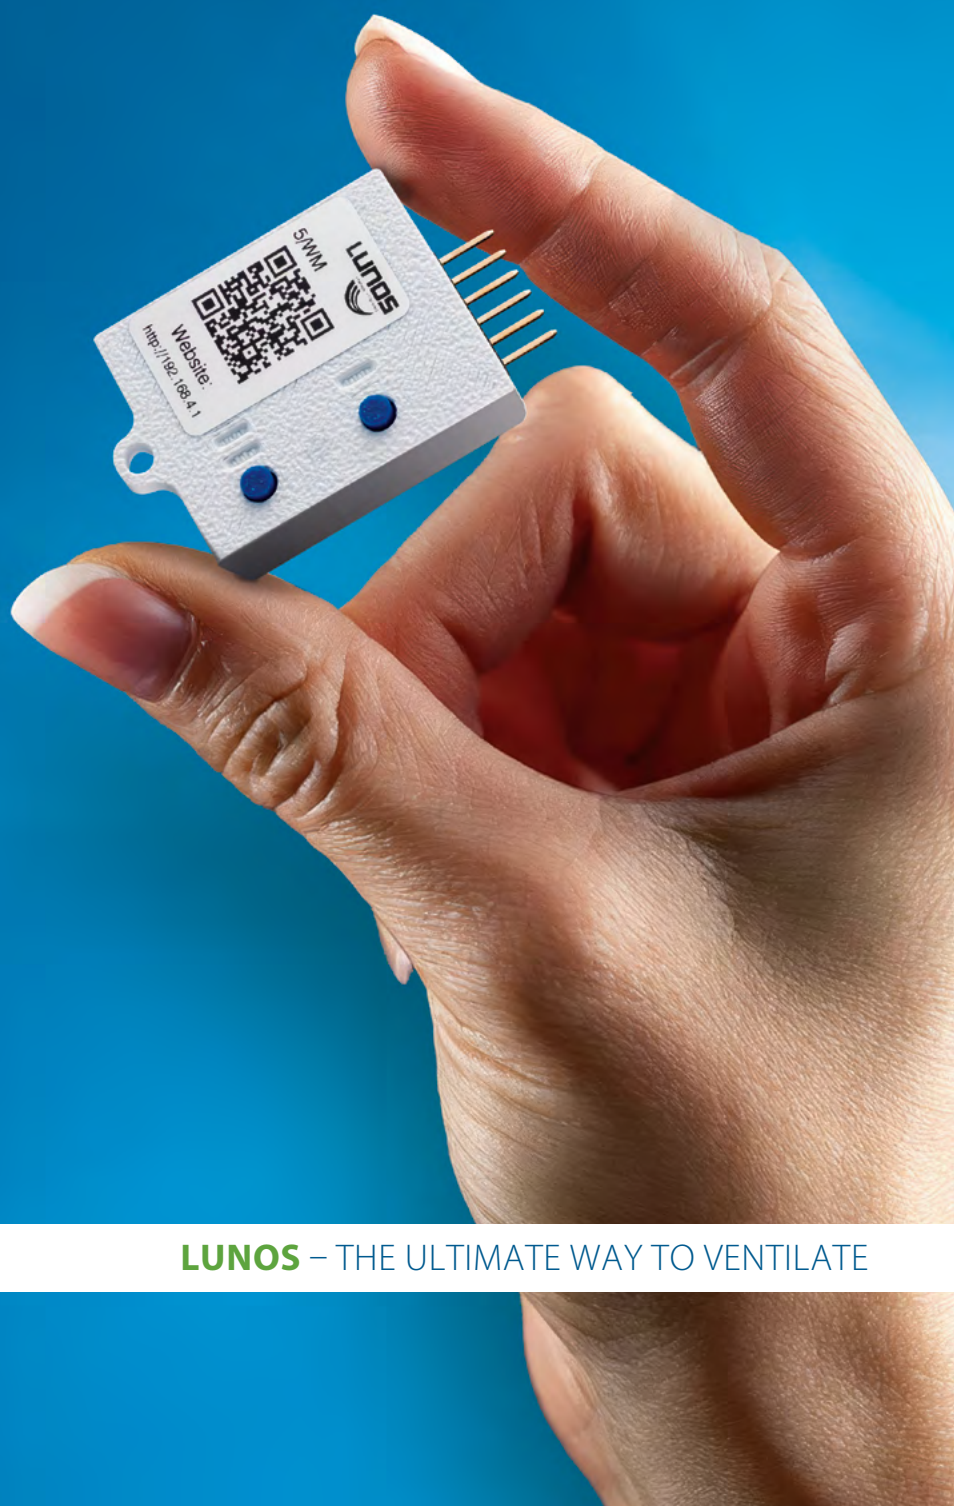

Cutting-edge WLAN module **for the Silvento:** Wireless freedom for maximum flexibility, real-time monitoring, one-click installation, no APP required, future-proof due to browser access, for all Silvento devices, backwards compatible.

WLAN module 5/WM for the Silvento ec

The latest innovation from LUNOS. With the 5/WM, you now have the freedom to control the ventilation system remotely. This module was specially developed for the Silvento ec exhaust fan and sets a new standard in user-friendliness and efficiency.

Thanks to real-time data monitoring, you can keep an eye on all important information at all times. While connected to a mobile device, all relevant data is recorded live and displayed in clear graphics. This transparency makes it possible to react quickly to changes and anomalies.

LUNOS – THE ULTIMATE WAY TO VENTILATE

SMALL DEVICE BIG IMPACT

Installation is very easy: Simply plug the module into the Silvento ec control board – done, WLAN connection via QR code – without an app – simply via the browser and thus create better air quality with sustainable solutions, at an unbeatable price.

'Thanks to our innovative technology, handling your ventilation system is easier and more convenient than ever before, without having to replace your entire ventilation system.'
